

# A 360° COVID-19 Vaccination Strategy: Success in Motion

AMN Healthcare and the Nation's Largest Healthcare Providers Partner to Accelerate Inoculations

When COVID-19 vaccinations were released in early 2021, our partners turned to us to help create vaccination implementation plans-of-action. While the asks were slightly different for each provider, an end-to-end strategy that included tracking, scheduling, and staffing for all contingencies was the end goal. We're proud to showcase our results for some of our partners below.

## A Large Healthcare Provider in CALIFORNIA

**THE CHALLENGE:** Stand up and staff multiple mass vaccination sites across the state within two weeks
